- Integrity
- Equality
- Team Work
- Professionalism

SOURCES OF FUNDING

- Development partners

ADMINISTRATION & MANAGEMENT

- General Assembly
- Board of Directors
- Technical Staff

PROGRAMS

HUMAN RIGHTS Our mandate is to advocate and promote human rights and freedoms as enshrined under the law and international conventions. We achieve this through legal education and sensitizing the public, Government and other law enforcement agencies. Visiting inmates under police custody and prisons to ensure respect and protection of their rights to liberty. We discourage and fight against evils such as mob justice, torture and all kinds of degrading and inhuman treatments against mankind.

DEMOCRACY AND GOVERNANCE We are committed to the promotion of democracy and good governance by monitoring to ensure peaceful, free, and fair elections. Through enlightenment of citizens and voters about their civil rights and freedom of franchise. Conducting sensitization to promote good leadership in society by training, mentoring and equipping authorities, leaders, institutions and the public with better leadership skills and knowledge that yields efficiency, competence and better service delivery to the masses.

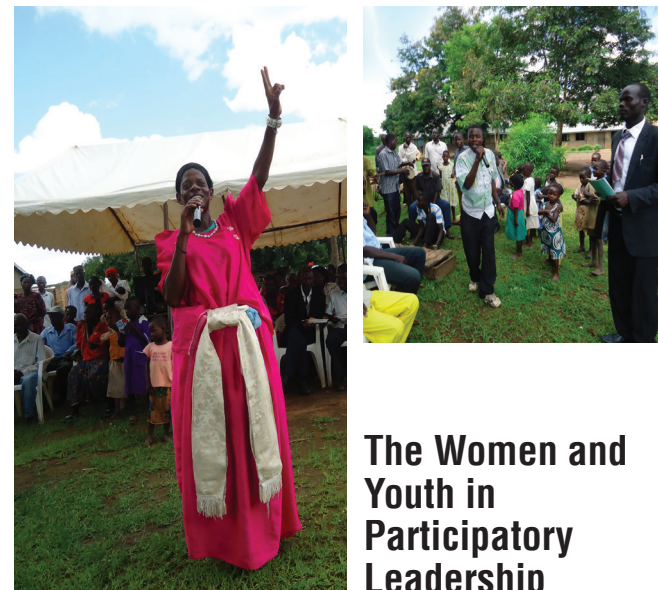

JUSTICE AND RULE OF LAW We enhance justice constitutionalism by observing and ensuring fair trials and treatment through provision of free legal aid services to the needy communities. We provide awareness of access to justice and equality before the law through group action where by, challenging bad practices, laws and policies that are unfair to the public. Our fighting injustice is done in collaboration with other non state actors to ensure respect of the law.

GENDER BASED VIOLENCE Gender based violence has been increasingly recognized as a serious Health issue, Human rights abuse and a development concern. Studies and surveys carried out in Uganda and globally, confirm that it has negative consequences for women and children. Physical, sexual and mental health has implications for the economic and social wellbeing of families. It is among our priority areas to promote harmony, so that people live a

violent free environment. These programs are conducted through workshops, media platforms and community outreaches.

TRANSPARENCY AND ACCOUNTABILITY We are a watch dog that monitors public programs and fights corruption with zero tolerance to bribery. We promote transparency, impeccable leadership and accountability among leaders and institutions both in private and public sector to ensure better service delivery to the people. This is done through periodic assessments and holding elected political leaders accountable to avoid mismanagement of resources and abuse of power.

POLICY RESEARCH AND ADVOCACY There is existence of various global challenges and advancements. This lead us to take up initiatives of conducting efficient research and innovations in various sectors on relevant policies and topical issues. This enables the organization to gather reliable information and data to make analogies, advocate and provide technical advice and assistance to governments, private sector and international partners for the attainment of sustainable progress in the World.
